DENOMINATOR

Discharges, for patients ages 18 years and older, with any-listed ICD-9-CM diagnosis codes for appendicitis. Discharges are assigned to the denominator based on the metropolitan area† or county of the patient residence, not the metropolitan area or county of the hospital where the discharge occurred.

†The term "metropolitan area" (MA) was adopted by the U.S. Census in 1990 and referred collectively to metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary metropolitan statistical areas (PMSAs).
